

Configuring Norton Security Firewall to enable Gabriel (Norton Version 22.2.0.31)

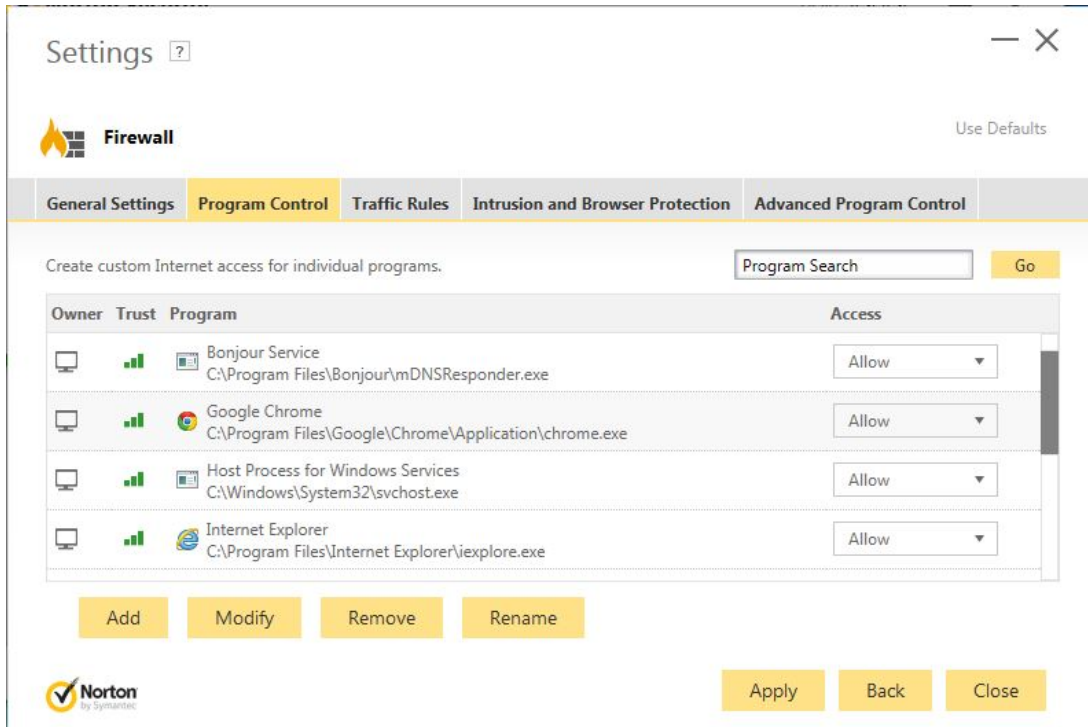

Step 1 – Go to settings and click on 'Firewall'

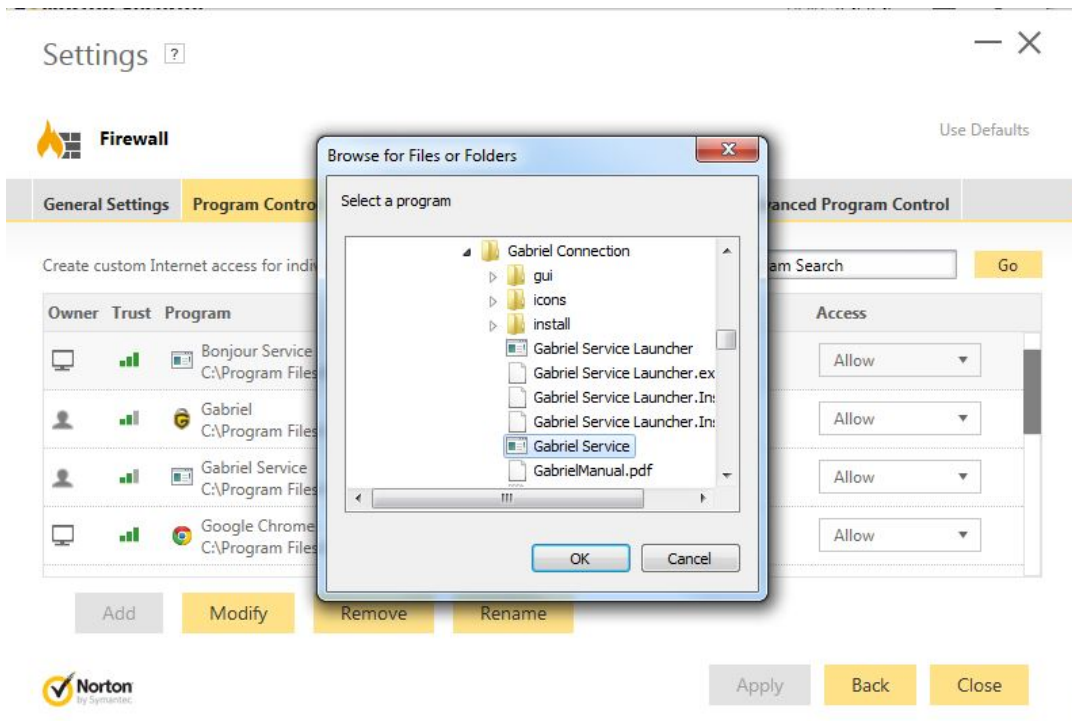

Step 2 – On Firewall screen, click on 'Program Control'

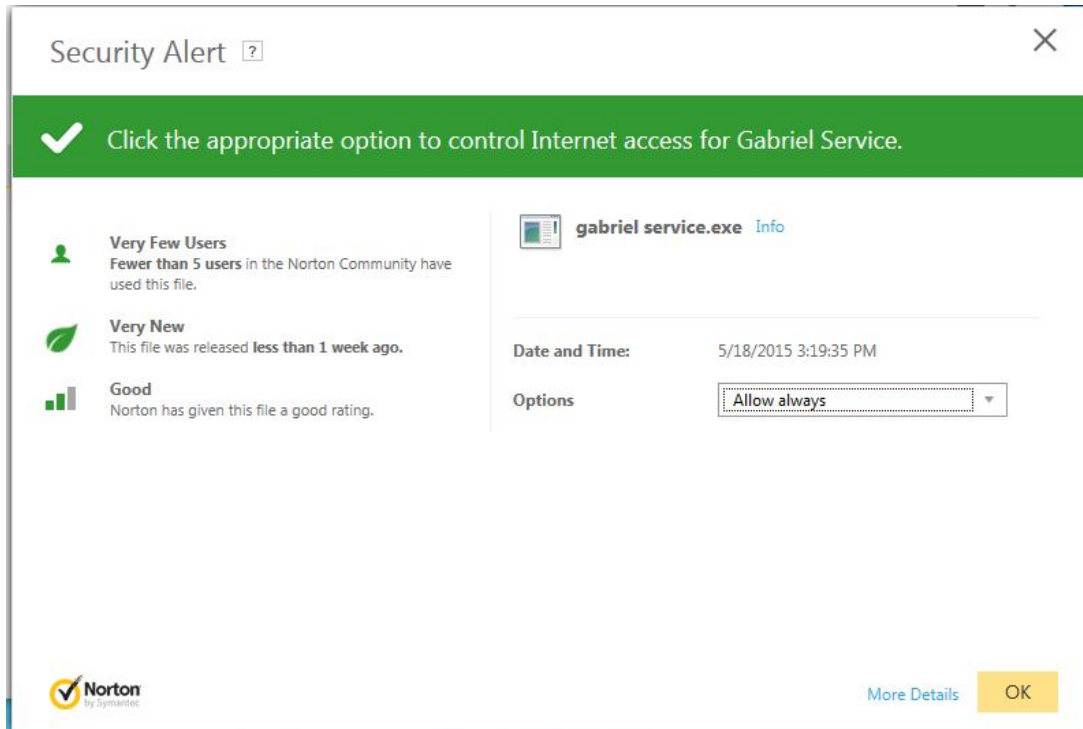

Step 3 – On Program Control screen click on Add

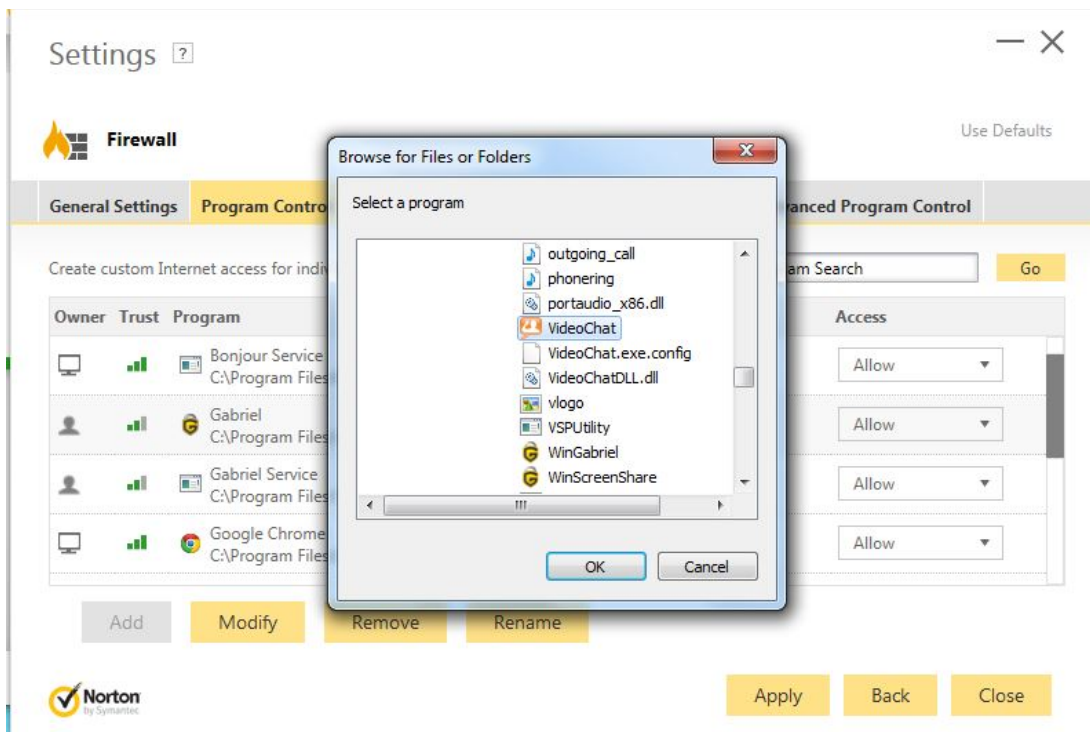

Step 4 – Browse for 'GabrielService.exe' under Program Files→Virnetx→Gabriel Connection, select 'GabrielService' and click 'OK'

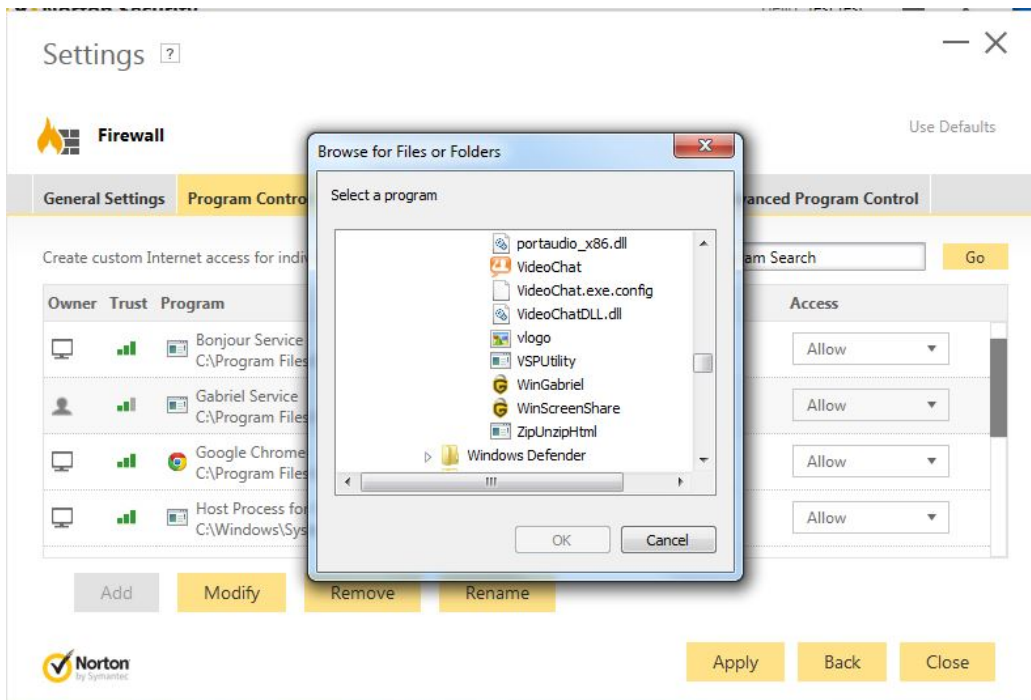

Step 5 – On ‘Security Alert’ screen select ‘Allow Always’ from under ‘Options’ drop down and click ‘OK’”

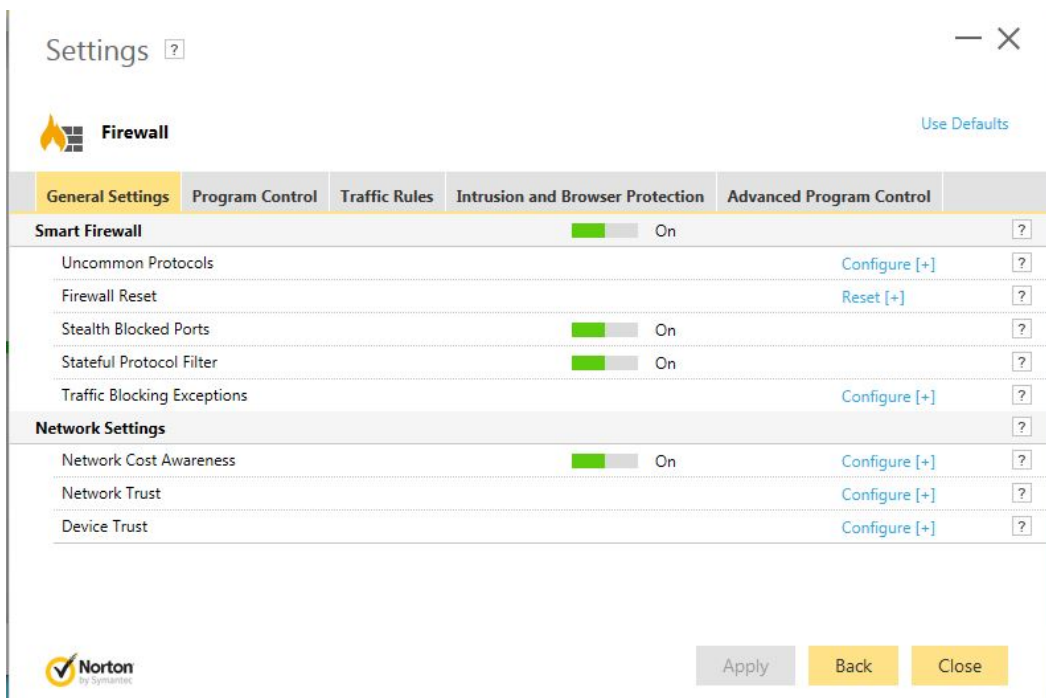

Repeat Step 3, 4 and 5 to add ‘VideoChat.exe’ and ‘WinGabriel.exe’ as well.

Step 6 – After adding ‘GabrielService.exe’, ‘VideoChat.exe’ and ‘WinGabriel.exe’ to list of programs click on ‘Apply’ and then ‘Close’.

Launch Gabriel by clicking the Gabriel icon on the desktop and you should now be able to connect.
